

Yasuda Koichiro <k.yasuda5160@gmail.com>

only change b_j by $\{\mathbf{b}\}_j$ (add line at 0.1 and perhaps 1 in relative values figure)

Hi Ko, the change requested by Danny was only to make the symbols the same as in the text. I Use a roman boldface b for the bias so as not to have the same symbol for bias and background. Could you please change this label in all the figures (and please add the line at 0.10 besides 0.5 in the relative values figure (I also wanted a line at 1 but one of the panels has 1 as the upper border of the figure. In any event, we could add the line in the other three panels.

Forget about all the changes I suggested. Not worth delaying the paper for those.

Best,
Graciela

Danny Marfatia <dmarf8@hawaii.edu>

I removed the boldface because it is usually used for vectors.

Dear Graciela, Danny, Muping,

The figures on overleaf are updated now.

Best, Ko

We can capitalize B_j . Also, we are using b to label the best fits $\delta\{\Phi\}^b_j$. Too many lower case b 's.

It is usual to use b_j for the bias. We can change the background to B_j . Do you want to do it?

Ok- Change the background to B_j . The bias is always called b_j .

Thanks Ko, please see my last message about the last small two minor changes, one to Fig 12 and another to Fig 13.

Please let us know when you do this. After, if we are all happy with the text we should resubmit v2 to the arXiv.

Graciela

There is no such rule that bias has to be b_i (!), but changing the bkgd to B_i is fine.

We have to change the b index in $\Delta \Phi^b_j$, but I'll let you change the notation based on some mysterious criterion.

You have not changed all the background b 's, and now we have B on both sides of Eq. 6.5. Let's be careful. This is always an issue when notation is changed in a hurry.

Hi, b here is just a counting the N_{boot} pseudodata- no mystery. It only appears in the appendix D $b = 1, 2, \dots, N_{\text{boot}}$ pseudodata sets.

No arcane use.

Yes, but it is still poor notation.

Thanks Danny for changing the previous B to D. I was going to do the same.

When Ko makes the two changes, one in Fig 12 and the other in Fig 13, would you be fine with the text as it is, so that we can finalize this version.

Best,
Graciela

Please check. There was also a $b(E')$ --> $B(E')$ after Eq. 6.6. I will find another index in the appendix.

Hi, thanks for changing the index b to p in teh appendix D. Is it OK.

Can I eliminate the blue color from all the text? Are you happy with it?

Graciela

To: Graciela Gelmini <gelmini@physics.ucla.edu>

Cc: Yasuda Koichiro <k.yasuda5160@gmail.com>, Muping Chen <mpchen1864@gmail.com>

I changed it to u, because $p=X/N$ and q (mom transfer) are taken. Yes, you can remove the blue color.

Hi, I need to finish working now.

When you are happy with the text, can you eliminate the color?

Thanks. Otherwise I will do it tomorrow if you give me the OK.

Good night,

Graciela

I was saying that we should check for other occurrences we may have missed.
